The Truth Beneath the Flood

The Great Flood was not one moment. It was a convergence.

I. The Scientific Layer: What the World Sees

1. Oceanic Heat Collapse

- Rising temperatures disrupted global currents.
- Superstorms formed in the Gulf and Atlantic. They parked over coastlines, flooding cities without end.

2. Greenland-s Ice Shelf Broke

- Sea levels surged. Coastal Florida disappeared.
- Miami became islands. The Carolinas began to sink.

3. Atmospheric Rivers Shifted

- Torrential rains soaked inland states-Missouri, Arkansas, even Oklahoma.
- Crops drowned. Levees failed. Rivers reversed.

4. Sinkholes and Fractures Opened

- With oil drained and aquifers emptied, the earth cracked.
- Florida-s karst foundation split. Quakes emerged. The land itself fell inward.

II. The Divine Layer: What the Faithful Know

1. The Sixth Trumpet Had Sounded

- And the world did not listen.

2. The Scrolls Were Dropped

- But the kings ignored them.
- The prophets were mocked.
- And the Lord withdrew the hedge.

This was not vengeance.

This was the consequence of deafness.

Not to destroy-but to humble.

III. What Survived

- The Sanctuaries.
- The Pattern.
- The Scrolls.

Carried not in power, but in obedience.

Borne not on walls, but in backpacks.

The water came.

And what was not built in righteousness was washed away.
